

# A YEAR OF COLORS

EXTERIOR TOP COLLECTION

# 365 colours like the days in a year. Colours for every season, colours... that are timeless.

*“365 A Year of Colours” is the result of research conducted by expert colour designers appointed by FASSA BORTOLO, who created a collection which stretches from typical shades inspired by tradition - renovation, restoration and historical recovery - to colours that are also ideal for use in modern architecture.*

The range, divided into 7 sections based on different colour trends, also provides designers with the opportunity of working in absolute safety and with maximum freedom of expression:

- to make direct comparisons between tones and strengths of colour that belong to the same section;
- to better assess the effect of decorations obtained with the “tone-on-tone” technique;
- to create polychromatic harmonies with colours coming from different sections.
